## TRIO Pension Plan

The TRIO Pension Fund is invested by professional investment managers in a diversified portfolio of investments including stocks and bonds. The Plan invests in Canadian and global equities, hedge funds, infrastructure and sustainable investments, as well as fixed income investments (bonds) that match the plan's liability profile -- mainly long term bonds and real return bonds. The growth portfolio is designed to provide a variety of sources of investment return with reasonable expected returns and reduced volatility.

The TRIO Board continues to monitor the Plan's funded position very carefully. The Board is focused on the stability of employee and employer contributions, as well as potential future improvements to pension benefits. The Board does not anticipate contribution increases in 2018, but you should be aware that contribution increases may be required in the future if the Plan's deficit grows larger.
